

AMENDMENT

U.S. Appln. No. 09/418,536

5017-1-005

B1
and.
recording the monitored ECG data in memory; and
activating an incident review mode in which the recorded
ECG data is displayed on the defibrillator screen of the
defibrillator used in the deploying step without the need to attach
the defibrillator to another external device for display.

B2
19. (Twice Amended) An external defibrillator comprising:
a controller;
an energy delivery system operable by the controller to
deliver an electrical shock from an energy source to an electrode
interface;
memory for recording incident data;
a screen;
an incident review activator; and
an incident review output comprising a visual image
generator, wherein the incident review output retrieves incident
data from memory upon activation of the incident review activator
by the user and displays the retrieved incident data on the
defibrillator screen without requiring communication with an
external device.
